## Answers

---

```
sum_squares = function(n1,n2){  
  counter = n2-n1 # Note: value of n2 should always be greater than that of n1  
  sum=0  
  i=0  
  while(i<counter)  
  {  
    sum=sum+(n1*n1)  
    i=i+1  
  }  
  print(sum)  
}  
  
sum_squares(10,20)
```
